

**Need help to determine which course is right for you? Here are some questions you should consider to help you select. [\(Link to questions in separate window\)](#)**

Choose the response that reflects your current level of knowledge and confidence:

**1. How familiar are you with AI in general (e.g., LLMs, automation, data tools)?**

- I've heard of it, but I'm not confident using it
- I've experimented a little personally but not in a board or business context
- I use it regularly and understand the basics
- I'm a more advanced user with multiple AI tools at my disposal

**2. In a board setting, I see AI as...**

- A confusing or risky development I need to understand better
- Something we should be talking about, but I'm not sure how to raise it
- A strategic tool I want to embed in governance and oversight
- Indispensable technology that is shaping the very future of what boards do

**3. Which best describes your current AI conversations at the board level?**

- We haven't started
- We've begun exploring and had a few discussions
- We're actively experimenting with AI and overseeing operational initiatives
- We've embedded AI tools into the very fabric of the boardroom

**4. What are you hoping to get from a masterclass on AI? (Select one or more)**

- A clear understanding of what AI is and what it means for boards
- Comfort with the language and concepts so I can ask better questions
- Practical examples of how to apply AI tools in the boardroom
- Advanced learning on the use of Agental AI and beyond

**Based on your answers:**

● If you mostly selected the *first* or *second* options in each question:

👉 **Join "Getting Smart About AI" (Beginner Level)**

● If you leaned toward a blend of the *second* or *third* option in most questions:

👉 **Join "Curiosity to Capability" (Intermediate Level)**

Or do both, they're designed to build on each other.
